Excelsus Landgoed: Your Gateway to International Genetics

Excelsus Growth Tests Finalized

Excelsus Test Bulls

Excelsus finished our yearly growth tests of at the end of December 2011 with a total of 93 Bulls from our three breeds put through their paces. The ADG from all the breeds were outstanding with the bulls all averaging above 2.2 kg's a Day. The bulls had been through a tough winter so some compensatory growth would have been achieved. Never the less, these bulls really shone and proved that the Excelsus brand does an outstanding job in a feedlot situation. The test lasted sixty days with a ration of Silage, Telviedre feed, Bran and Hominy Chop.

PRR Prevail, Wisp Will Zane and Excelsus Galen Winner Sires

The two main winners were Excelsus Prairie and Excelsus Zack. Prairie is out of the bull breeding machine PRR Prevail and the top young cow Excelsus Icy that is a product of the Wisp Will Enos and Maratana Langman magical combination. Zack is from Wisp Will Zane and one of our star Manso Brahman cows Santana.

Both are polled!!

Prairie

Zack

HDL0633B Excelsus Galen sons stand strong!

This phenomenal bull just keeps on coming! Galen's first crop on sons were the toast of the 2011 sale with Gucci been the top seller. The next crop have graced

most of our news letters and many of their photos made it onto the "Nikon" pamphlet of 2011. Galen's 2010 calves scored highly at the growth test end with

Gobi, Garry, Galio, Gilder with Excelsus Gus doing well at the Overvaal bull tests. It is important to remember that Galen has only been used on heifers!

Gus

Excelsus Scout: A New Generation Excelsus Bull

Scout

Excelsus Scout is the first product from a long breeding program which has us travel to Texas and source the very best bulls that America has to offer. Scout is bred from one of our own National Champion Metsibra UDM9453B daughters and is a bull that we will have to use in our own studs. Scout is unfortunately not polled.
